

# Renewable Carbon-Way Brush-Holders for Railway Motors

Many modern railway motors are equipped with brush-holders having renewable carbon-ways. These brush-holders are also available for older type motors.

Good operation requires the prompt replacement of worn carbon-ways. With the non-renewable type of brush-holder it is necessary to scrap the complete holder when the carbon-way becomes worn out. There is a tendency to continue operation with the worn part rather than make replacement. This usually results in a higher maintenance cost than if the complete brush-holder were thrown away.

Many motors now in service have worn holders that should be replaced. It is strongly recommended that these be replaced by the RENEWABLE CARBON-WAY type. By such substitution the future replacement of a carbon-way can be made quickly and at minimum expense, since the cost of the RENEWABLE CARBON-WAY is but a fraction of the cost of the complete holder.

Brush-holders of this type are available as listed below.

MOTOR		Type of Support	CAT. NO. BRUSH-HOLDER COMPLETE		Cat. No. Renewable Carbon-Way Only
Type	Volts		Axle Side	Suspension Side
